

Allow LOCiS to manage your Asset Management...

LOCiS Asset Management is a powerful Web Based fixed asset tool, it tracks and records all changes that occur during an asset's lifetime.

- Infinite number of assets to track/keep inventory.
- Ability to enter the standard depreciation schedules for Assets based on categories/funds.
- Uses Standard Depreciation methods. Straight Line, Sum of Year digits, Double Declining balance.
- A "Playground" to test Depreciation Scenarios.
- Standard Fixed Asset Reports can be produced at any time to reflect the Asset's value at any point in time.
- LOCiS Fixed Assets addresses GASB compliance.
- Ad hoc queries to report on any Asset Type or Status.
- Security – allows individual users to be able to view, maintain, delete or edit Assets.
- Image carousel for individual Assets.
- Web folder storage for documents and images.
- Property link to internet mapping and street View for real estate.
- Ability to create Maintenance schedules for any
